DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, and 18-20 drawn to an oligonucleotide or a composition comprising said oligonucleotide consisting essentially of arabinose sugars.

Group II, claim(s) 7, 9-15, and 17 drawn to a method for cleaving a single stranded RNA.

Group III, claim(s) 8-12, and 17, drawn to a method to inhibit DNA replication and/or DNA transcription.

Group IV, claim(s) 16, drawn to a method for catalyzing chemical reactions carried out by DNA enzymes.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-IV appear to be related to the general concept of oligonucleotides comprising arabinose sugars, and the use thereof. However, this general concept is not considered inventive since it does not represent a special technical feature over the prior art. For example Mulder (US Patent No. 5,550,047) discloses oligonucleotides comprising arabinose sugars, see col. 5, lines 65 through col. 6, line 10. Additionally Beaton et al. (US Patent No. 5,625,050) describes an oligonucleotide comprising arabinose sugar units, and further comprising fluorine in the 2' position, see col. 6, lines 15-44. Therefore, the inventions

Art Unit: 1635

according to Groups I-IV do not share a general concept or technical feature that makes a contribution over the prior art.

3. According 37 CFR 1.475(c), if an application contains claims to more or less than one of the combinations of categories of invention set forth in 37 CFR 1.475 paragraph (b), unity of invention might not be present. It is noted that Groups I-IV are drawn to a product and multiple methods of use of said product. Moreover, according to 37 CFR 1.475(d) If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application and the first recited invention of each of the other categories related thereto will be considered as the main invention in the claims, see PCT Article 17(3)(a) and § 1.476(c).

4. A telephone call was made to Robert Mitchell on 5-29-03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Janet L. Epps-Ford, Ph.D. whose telephone number is 703-308-8883. The examiner can normally be reached on M-T, Thurs-Fr, 8:30AM-6:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John L. LeGuyader can be reached on 703-308-0447. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3014 for regular communications and 703-746-5143 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0196.
